

THE WISDOM OF LUXURY.

Lineage 1000[®]
BY EMBRAER

Optional floor plan with stand-up shower. 4,085 cubic feet (115.7 cubic meters) of cabin volume in five distinct privacy zones.

Both privacy and practicality go to new lengths in the all-new Lineage 1000®, the first luxury jet designed in the 21st century. With cabin volume three times larger than traditional business jets, the Lineage 1000 transports up to 19 passengers in uncrowded comfort. The interior divides into five distinct privacy zones that feel like separate rooms. Literally hundreds of cabin configurations are possible.

The elegant interior, designed by Priestman Goode and completed by DeCrane, can include two or three lavatories, a bedroom with stand-up shower, and separate rest quarters for the crew. State-of-the-art entertainment and office communication amenities maximize relaxation and productivity. The category's

largest in-flight-accessible luggage area makes it easy to change clothes before landing.

Unique capabilities of the Lineage 1000 enable operation even in restrictive airports such as Teterboro, London City and Aspen. All-glass cockpit, intuitive interface, and state-of-the-art Honeywell Primus Epic® platform enhance situational awareness. Integrated systems and fly-by-wire add to the jet's superb performance, both in-air and as an investment. Embraer's high-utilization engineering ensures long life and quick turnarounds. The Lineage 1000 costs far less per hour to fly than its competitors, and has been acclaimed for its value by unbiased industry media.

PERFORMANCE DATA

Range IFR*	4,200 nm	7,778 km
High Speed Cruise	469 ktas	869 km/h
MMO	M 0.82	
Max. Operating Altitude	41,000 ft	12,497 m
Takeoff Field Length**	6,660 ft	2,030 m
Engine Thrust APR	20,000 lbf	89.0 kN

*NBAA IFR reserves (35 min) with 200 nm alternate; 8 passengers @ 200 lb
